SUMMARY

For 9 years, I have facilitated end-to-end UX processes where I closely partner with product management, engineering, and user research. A dual designer and technologist, I specialize in rapidly prototyping for a range of interaction paradigms, from traditional web to native mobile to voice assistants. With my diverse skills and holistic thinking, I have led design efforts across platforms for a wide array of problem domains: natural language, mobile search, editorial design, publishing, digital advertising, and infrastructural engineering.

EXPERIENCE

Nov 2015 - Present

Sr. Designer/Prototyper, Search

Yahoo, Sunnyvale

Currently designing and prototyping for multimodal experiences and evangelizing new design methodology within the company; Automating experiments with ASK CLI and AWS

Facilitating UX studies for search experiences across desktop and mobile web; led the design of a nascent AI platform to streamline chatbot development

Mar 2014 - Nov 2015

Sr. Designer/Prototyper, Media

Yahoo, Sunnyvale

Organized concept and design experimentation for "communities around content" org strategy; led desktop and mobile web prototyping efforts for Yahoo homepage and media vertical experiences

Dec 2012 - Mar 2014

Designer/Prototyper, Platforms AdUX

Yahoo, Sunnyvale

Designed and prototyped various responsive ad units; co-developed web frontend for experimental responsive ad platform concept

June 2009 - Dec 2012

Interaction Designer, Developer Products

Yahoo, Sunnyvale

Owned design language and implementation across various infrastructural engineering teams; created first design culture in an engineering-focused organization
* Converted from intern to full-time employee

Summer 2008

Software Engineering Intern

Apple, Cupertino

Summer 2007

Software Engineering Intern

Hewlett-Packard, Cupertino

PROFESSIONAL SKILLS

Design and Prototyping Tools

Sketch	HTML/CSS (SASS/LESS)
Zeplin	JavaScript, Node.js
Craft	Framer, CoffeeScript
Adobe Photoshop	Alexa Skills Kit CLI, AWS Lambda
Adobe Illustrator	Twitter Bootstrap, Yeoman
OmniGraffle	jQuery, d3, React
Keynote	Python
	Git/GitHub

Design Methodology

Hypotheses	Scenarios
Competitive Analysis	Flow Diagrams
Contextual Inquiry	Wireframes
Generative Studies	Visual Mocks
Heuristic Evaluations	Visual Style Guides
Usability Testing	Rapid Prototyping
Card Sorting	

PUBLIC SPEAKING

Stanford Digital Media Academy 2016

Invited as a role model and guest instructor for various youth groups (e.g. ages 8-17) taking coding bootcamp classes; advised Made by Girls participants interested in STEM fields

Yahoo User Interface Conference 2013

Gave a talk on prototyping methodology inspired by LEGO building principles to frontend engineers across the tech industry

EDUCATION

B.S. in Computer Science 2009

California Polytechnic State University, San Luis Obispo
